My experience

UX designer

August 2017 – current time

Egnyte <http://egnyte.com>

Currently working on two projects — Egnyte Connect and Egnyte Protect for multiple platforms — web, mobile and desktop. The goal is an ongoing definement of user's needs and permanent adding of new and updating current functionality based on customers requests and market changes.

SAAS UX Designer

May 2014 – current time

Upwork <http://upwork.com>

Being a freelancer have designer 20+ complex SAAS solutions for web and mobile for numerous markets from all over the world.

Co-owner / UX Designer

May 2016 – current time

Upboost <http://upboost.net>

Upboost Job Ripper is a service that provides automatic search among jobs added on upwork.com. In order to create a new search user has to fill in Search Parameters, Sorting Parameters and confirm search based on the sample results provided. Each user can select between Basic and Advanced search parameters and get more than 40 different parameters — from job type and category to client's rating for example.

UX designer

June 2017 – June 2018

Atiim <http://atiim.com>

Atiim is a data-driven goals management SaaS for high-performing organizations. Was responsible for the overall company UX design working together with UI designer. My goal was to completely re-design and add new features to existing SAAS solution. Was working closely with CEO, CTO and CMO.

UX designer

Oct 2016 – March 2017

Dubailist <http://dubailist.com>

Dubailist is one of the biggest marketplaces in the United Arab Emirates.

My main goal was to completely re-think the UX for an existing marketplace and add new functionality to it on the ongoing basis. I was working closely with project owner and was partially managing the development team.

Project Manager / UX Designer

May 2014 – April 2016

Zapporoo <http://zapporoo.com>

Zapporoo is a full-service mobile development company based in Miami, Florida. Main company focus is development of mobile apps for iOS and Android for start-ups and small companies. Was simultaneously working on up to 7-8 projects creating UX designs for mobile applications for startups.

Was fully managing the remote dedicated development team — 12 developers
